NOVENTIQ TEST · G2 PLAN

Accounts, pipeline and gross profit, every number traceable to source

One storyline of six beats and two hood beats on **Noventiq Watchtower**, a Code Builder app on Noventiq's colour, built by Nebula on orbit.uat.unifyapps.com for three POC entities: Noventiq Germany, Embee and NQ AI. The story row is **Kestrel Pharma (NQ-C-0042)**, one customer held under three names in three CRMs, whose unmatched record stops the Q3 close.

BEATS	ASKS COVERED	SIZE	OPEN QUESTIONS
6 + 2	31	5 · 7 · 4 · 1	7
story beats + hood beats	25 by a beat · 4 by a control · 2 open	pages · objects · automations · AI agent	for the owner, section 5

1. Storyline

Presenter in the seat of Priya Raman, Group Finance, switching to Sales from the header. Modes: live runs for real; seeded is pre-written and labelled AI; deterministic is rule logic, never shown as AI; mocked replaces an outside system.

#	BEAT: THE PRESENTER DOES, THE SCREEN SHOWS	ROUTE	ASKS	MODE
1	**One customer across three CRMs** Priya Raman (Group Finance) searches Accounts for Kestrel and opens NQ-C-0042: one key over DYN-ACC-3317 Kestrel Pharma Pvt Ltd (Dynamics 365, Embee, $1,840,000), CRE-88412 Kestrel Pharma GmbH (Creatio, Noventiq Germany, $960,000) and BW-0719 KESTREL PHARMA LTD. (Black and White CRM, NQ AI, $210,000, Unmatched); $3,010,000 this year; child Kestrel Pharma Research.	`/accounts`	A1 A5 A11 A20 A33	live live
2	**Pipeline in one group set of stages** Filters Cloud and Germany: open pipeline $3,795,000 in 16 deals by group stage and service line; 2026-Q4 weighted booking forecast $1,598,500 and expected GP; the Mapping tab shows Dynamics 365 "1-Qualify" and Black and White "Hot" both mapped to Qualified, local service codes to the catalogue, each with its owner.	`/pipeline`	A3 A7 A12 A21 A22 A27	live live; expected GP deterministic; CRM status mocked

#	BEAT: THE PRESENTER DOES, THE SCREEN SHOWS	ROUTE	ASKS	MODE
3	**Gross profit, last four quarters, traced to source** Quarters Q4 2025 $784,880 · Q1 $800,260 · Q2 $2,026,660 · Q3 $852,880 under rule GP-01 (owner Meera Iyer). Kestrel's Q3 $70,740 opens to its NetSuite and SAP Business One lines; $60,960 sits under Unassigned customer. PRJ-NQAI-014 is Over plan: 50 days planned, 55 running, GP −$3,800. As Sales, people cost is hidden.	`/gross-profit`	A2 A3 A4 A6 A13 A14 A23 A24 A28 A31 A32	live live
4	**The close refuses (failure beat)** Reconcile Q3: Noventiq Germany Reconciled; Embee Reconciled after the −$1,200,000 late-rebate reconciling item (DI-102); NQ AI Blocked: "DI-101 unmatched customer BW-0719; computed $56,200 against $117,160 in the accounts, difference −$60,960".	`/data-issues`	A15 A16 A30	live live
5	**Fix the data, then close** Opens DI-101: AI-suggested match NQ-C-0042 (name 0.91, same tax registration), owner Daniel Weber. Match writes the account, one GP line and one deal; DI-101 Fixed beside DI-104 fixed earlier. Reconcile Q3 again: all three Reconciled, NQ AI with warning DI-103. Kestrel's Q3 GP is now $131,700.	`/data-issues → /gross-profit`	A16 A17 A20 A25 A30	live live; suggested match seeded
6	**Lean-forward: ask the watchtower** Rebates by vendor, entity and segment shows RB-EMB-MS-26Q2 $1,200,000 Booked a quarter late. The assistant answers "Why is Embee's gross profit in Q2 2026 so much higher than in Q3?" with the rebate, GP-01, Q2 $1,678,600 vs Q3 $511,380 and its sources; it declines "What is Ananya Rao's salary?".	`/rebates, assistant panel`	A8 A9 A14 A15 A26	live live agent
H1	**Hood: the Reconcile gross profit automation** After beat 5, open it in the automation canvas: GP-01, the 0.5% tolerance, the blocking-issue check, the named rule owner.	`automation canvas`	A23 A25	live live
H2	**Hood: the Watchtower assistant** After beat 6, open it in the agent builder: instructions, its one read-only tool, the persona filter that hides people cost from Sales.	`agent builder`	A14 A31	live live

Alternatives considered for the lean-forward moment: B / C

- **B** · An AI-suggested mapping of a new local service code accepted live (A22): shows AI mapping, but quiet on screen and part of the data layer.
- **C** · The 2026-Q4 booking and profit forecast (A7): a number, not judgement, and it overlaps the sales watchtower.
- **Why beat 6** · A9 (P0) asks for a digital assistant beside the dashboards, the profile names an AI assistant over live data, and one answer ties the rebate, the late booking and Finance's rule together.

AI surfaces and other modes

SURFACE	MODE
Watchtower assistant answers	live live
Suggested customer match on DI-101	seeded seeded
AI-suggested stage and service mappings	seeded seeded
Expected gross profit on Pipeline	deterministic deterministic, not shown as AI
Reconciliation result and reason	deterministic deterministic, the GP-01 rule
CRM status beside each deal	mocked mocked: no CRM connection
Source systems behind every line	mocked mocked: seeded rows shaped like each system
Persona switch Finance or Sales	mocked mocked: stands in for sign-in

2. What gets built

KIND	NAME	FOR	BEATS
object	**Noventiq · Customer**	One legal customer, its one key and hierarchy	1, 3, 5
object	**Noventiq · CRM account**	An account as each country CRM holds it, with its match	1, 5
object	**Noventiq · Opportunity**	Deals with local and group stage, local and catalogue service	2
object	**Noventiq · GP line**	Quarterly gross profit lines with their ERP, payroll and timesheet sources	3, 4, 5, 6
object	**Noventiq · Rebate**	Vendor rebates by vendor, entity and segment, earned and booked	6
object	**Noventiq · Data issue**	Issues the rules found, owner, severity, fixed or open	4, 5
object	**Noventiq · Reconciliation**	Gross profit against the accounts per entity and quarter	4, 5
automation	**Noventiq · Match customer**	Gives BW-0719 its group key; fixes DI-101	5
automation	**Noventiq · Reconcile gross profit**	GP-01 against the ledger per entity; refuses with the reason	4, 5, H1
automation	**Noventiq · Read watchtower data**	The assistant's read-only tool; hides people cost for Sales	6, H2
automation	**Noventiq · Ask the assistant**	Passes the app's question to the agent	6

KIND	NAME	FOR	BEATS
AI agent	**Noventiq · Watchtower assistant**	The digital assistant over the same data, every number with its source	6, H2
code app	**Noventiq Watchtower**	Accounts, Pipeline, Gross profit, Data issues, Rebates and the assistant panel, on Noventiq's colour; PRIVATE	1–6

Size against the reference

COUNT	THIS DEMO	REFERENCE
Pages (screens)	5	4
Objects	7	3
Automations	4	3
AI agents	1	1
Tasks in the graph	35	—
Estimated Nebula plans	4	—

Over the reference on pages, objects and automations: a flag, not a cut. The build runs as about 4 Nebula plans.

The look

The design system's stylesheet with its colours moved to hue 215. Candidates, all from Noventiq's own header logo (the site declares no colour variables): `#0B408B` wordmark navy, used · `#25AADD` cyan · `#E31D22` red accent.

3. Data

Source: assumed, shaped like Noventiq's systems per entity: Creatio, Dynamics 365 and Black and White CRM; NetSuite, SAP Business One and Tally; local payrolls; Zoho Projects and Azure DevOps. No file was given. **Masking:** none needed: all rows are fictional, with invented companies, people and identifiers; amounts in USD add up line by line. Everything lives in UnifyApps Storage.

ENTITY	ROWS	WHAT IS IN IT
Customer	12	named rows; story row NQ-C-0042 Kestrel Pharma
CRM account	18	named rows across Creatio, Dynamics 365, Black and White CRM
Opportunity	20	named rows, 3 entities, 5 countries
GP line	57	a file of rows, 2025-Q4 to 2026-Q3, each with ERP, payroll and timesheet source
Rebate	12	named rows: Microsoft, AWS, Cisco; one booked a quarter late

ENTITY	ROWS	WHAT IS IN IT
Data issue	4	the three difficult cases plus one fixed earlier
Reconciliation	12	ledger per entity and quarter; Q3 not yet run

12 expected answers for the assistant (9 facts, 3 refusals) are checked against these rows at verify.

4. Intent and coverage

Proposed intent: both. The audience asked for working views and an assistant (the outcome) and for definitions they can own and change (customer key, stages, mapping, the GP rule): two hood beats show the rule in the automation and the assistant in the builder.

COVERED	ASKS
By a beat	A1 A2 A3 A4 A5 A6 A8 A9 A11 A12 A13 A14 A15 A16 A17 A20 A21 A22 A23 A24 A25 A26 A28 A30 A33
By a control	A7 Booking forecast and expected GP tiles, Pipeline A27 Mapping tab, Pipeline A31 Persona switch Finance or Sales, Gross profit A32 India people-cost note, Gross profit
Left open	A10 Demo date and audience: question 4 A29 A deal's status read live from the CRM: question 5
Out of scope (G1)	A18 A19 A34 A35 A36 A37 other use cases until promoted

Assumptions the plan made

- The 9 G1 questions were not answered; each recommended option is used: views accounts and pipeline, gross profit and vendor rebates (utilisation A6 and the booking forecast A7 kept as controls, no ask cut); Creatio; two personas, Finance and Sales; deliverables 1, 2, 3 and 5 and the test-report measures (A18, A19, A34–A37) stay out.
- Brand: noventiq.com declares no colour variables; the three colours of Noventiq's own header logo are the candidates. The wordmark navy is used (standing answer for an ambiguous colour).
- Logo: Noventiq's header logo from noventiq.com, used as published.
- Assistant model: Nebula's recommendation. Deploy and publish on the tenant without asking; the app is PRIVATE.
- Amounts in USD; calendar quarters; all names, companies and identifiers invented.
- The code app name Noventiq Watchtower is free; if taken it gets the suffix "· Demo".

5. Open questions

Reply in the G2 thread with the number and a letter, or "as recommended".

1 **Intent: what should the audience leave with?**

- **both**: the outcome first, then two hood beats (the Reconcile automation, the assistant in the agent builder) — recommended
- use-case: no hood beats
- platform: two to four hood beats and a description on every node and field

2

Entities and countries (A1). The NetSuite and Creatio entity is assumed to be Noventiq Germany; Embee and NQ AI are both in India, though A1 says three countries.

- **Keep Noventiq Germany, Embee and NQ AI**, deals spread over Germany, Austria, Switzerland, India and Singapore — recommended
- The lead names the first entity and its country
- The lead names three other entities

3 **Data: the client's slide asks for "a working prototype on real data".**

- **Fictional data shaped like their systems**, with the unmatched customer, the late rebate and the missing timesheets seeded — recommended
- Noventiq sends extracts per entity; the plan profiles and masks them before seeding (up to 200 rows per object)

4 **Demo date and audience (A10).**

- **Ready by 9 Nov 2026 for the 10 November demo** to Noventiq's group finance and sales leaders, in person — recommended
- Another date or audience the lead gives

5

A deal's status read live from the CRM (A29): no Dynamics 365, Creatio or Black and White connection exists on the tenant.

- **Show the stored status labelled as read from the CRM**, and say it would be read live — recommended
- The lead provides a sandbox CRM connection; its credential is asked for at build

6

External step: the tenant’s only Jira connection lists no projects; no CRM, ERP or ITSM connection exists.

- **No external step**; the demo stands on its own data — recommended
- The lead names a Jira project on a connection that sees it; Data issues raises DI-101 as a DEMO-TEST issue
- Email the reconciliation result from the tenant’s Outlook connection

7

Two sources were not read: the recording “Noventiq Use Case.mov” and the insurance claim AI accelerator shared as the UI reference (A9).

- **Go ahead without them**: one assistant beside dashboard views — recommended
- The lead shares a transcript or the reference; the plan is checked against it before G3
