CLICKUP DELIVERY COMMAND DASHBOARD · G2 PLAN

Make all three visible and actionable

Earlier warning, less reporting, balanced staffing: one storyline of six beats and one hood beat on ClickUp Delivery Command, a Code Builder app on ClickUp's own colour, built by Nebula on orbit.uat.unifyapps.com. The story row is **Sakura Mobility (IMP-2611)**, At risk 21 days before its 16 Nov 2026 go-live.

BEATS	ASKS COVERED	SIZE	OPEN QUESTIONS
6 + H1	103	10 · 17 · 14 · 1	16
20 minutes, projector	66 by a beat · 24 by a control · 13 open	pages · objects · automations · AI agent	11 from G1, 5 new

1. Storyline

Presenter in the seat of Kenji Arai, implementation lead, switching persona from the profile menu. Mode: live runs for real; seeded is pre-written and labelled AI-written; deterministic is rule logic, never shown as AI; mocked replaces an outside system.

#	BEAT: THE PRESENTER DOES, THE SCREEN SHOWS	ROUTE	ASKS	MODE
1	**Monday: the summary, then the portfolio** Elena Fischer opens the executive summary (six numbers, value bridge, top movers led by Sakura Mobility), emails it to herself, then filters Portfolio to Japan + At risk: "1 of 18", Sakura Mobility; saves the view and shares it.	`/summary, /portfolio`	A6 A7 A8 A11 A13 A14 A15 A16 A17 A18 A48 A49 A50 A59 A62 A65 A70 A71 A72 A73 A90 A97	live live · counts seeded
2	**Sakura Mobility's workspace and the change it needs** Kenji Arai reads the overview (Go-live, 21 days, 1,236 of 1,480 h, 3 risks), moves a task on the Board, previews a timeline shift (go-live 18 Nov, cancelled), opens RAID and Activity, then raises CR-0457 (+56 h, JPY 1,120,000, +5 days) with before and after side by side.	`/projects/IMP-2611`	A19 A20 A21 A22 A24 A25 A31 A32 A74 A75	live live
3	**The rule routes the approval (failure beat)** Elena approves; 56 h ≥ 40 so it routes to the Finance partner. Marcus Bell rejects with no reason and is refused: "A rejection needs a written reason." He approves: go-live moves to 21 Nov 2026, planned hours 1,536, an Activity row.	`/changes/CR-0457`	A10 A33 A34	live live · rule deterministic
4	**Staffing the change without burning anyone out** Tom Hale tries to book Yui Sato 16 h in the weeks of 9 and 16 Nov: before saving, "Yui Sato would be at 120% (8 h over each week)". The skills matrix finds Daichi Ono (data migration 3, Japanese 4); booked at 90%.	`/resourcing`	A3 A26 A27 A28 A64 A81 A88	live live · rule deterministic
5	**The sponsor's view, in Japanese** Haruto Mori, in 日本語, sees only Sakura Mobility and no internal health; signs off the Cutover plan; books a training slot (taken slots greyed); sees "214 of 50,000 rows need fixing" before Confirm; three checklist items Not set.	`/portal/*`	A4 A42 A43 A44 A45 A46 A47 A60 A68 A82 A83 A87 A98	live live

#	BEAT: THE PRESENTER DOES, THE SCREEN SHOWS	ROUTE	ASKS	MODE
6	**Lean-forward: Delivery Copilot over live data** Kenji asks "Which Japan projects go live in November and are at risk?"; stages tick; the answer names Sakura Mobility with links and the AI-written label; a go-lives-by-month chart; the 78% risk flag with evidence; a weekly status report drafted, edited, published and exported. The invoice question is declined.	`Copilot panel`	`A1 A2 A5 A35 A36 A37 A38 A41 A78 A79 A96`	live live · flags seeded
H1	**Under the hood** The 40-hour branch and the reason check in ClickUp Command · Decide change request; ClickUp Command Copilot and its one read-only tool.	`automation canvas, agent builder`	—	live live

The lean-forward moment, beat 6. Alternatives considered: B / C

OPTION	WHY NOT CHOSEN
B · Meeting summary turned into proposed tasks the lead accepts (A39, A40)	Strong, but its summary is seeded, so the room sees no live AI.
C · Portfolio risk prediction as the reveal (A41)	Visual, but the score is seeded, and the brief names an assistant over live data.
Chosen · a live question over the data the room just changed, plus the 10-minute status report	Lands both headline goals, A1 earlier warning and A2 less reporting, on live data.

Story row

Project	Sakura Mobility · IMP-2611 · Automotive · Japan · 9,200 seats · JPY 62,400,000
State	Stage Go-live (6 of 7) · go-live 16 Nov 2026 · At risk (On track last week) · 1,236 of 1,480 budget hours
People	Lead Kenji Arai · sponsor Haruto Mori (Japanese) · director Elena Fischer · finance partner Marcus Bell · resource manager Tom Hale · consultants Yui Sato, Daichi Ono
Risk	RSK-1183 "SSO cutover rehearsal failed twice", likelihood 4 × impact 5 · Copilot flag 78%
Change	CR-0457 raised live: second user-list migration wave, +56 h, JPY 1,120,000, go-live +5 days to 21 Nov 2026 · route Delivery director then Finance partner

The look

Brand colour from clickup.com, sampled as ambiguous; the profile takes the recommended one. Logo: the official ClickUp wordmark from the clickup.com header, and the symbol for the collapsed rail and tab icon, used as published.

COLOUR	SOURCE ON CLICKUP.COM	
#5F55EE	--ProductScreen-CustomStatus-Primary	recommended, used
#6647F0	--Core-Accents-Purple	
#7612FA	--Table-Accent	
#0091FF	--Core-Accents-Blue	
#FC6D2D	--Core-Accents-Orange	
#FF02F0	--Core-Accents-Pink	

3. Data

Source: assumed, fictional, shaped like the BRD's sample content (its six customers, IMP-, CR- and RSK- ids, USD, EUR and JPY). Masking: none needed, every name is invented, emails are @example.com, no phones. Rows live in UnifyApps Storage objects. Headline counts on the summary and portfolio read like the BRD's portfolio of 214 projects from the Weekly metric rows (G1 question 8).

OBJECT	ROWS	HOW THEY GET IN
Project	18	record · seed

Expected answers (eval.csv)

QUESTION	EXPECTED ANSWER	KIND
Which Japan projects go live in November and are at risk?	Sakura Mobility (IMP-2611): go-live 16 Nov 2026, At risk; Tsubame Insurance (IMP-2618, 27 Nov) is On track and not listed	fact
Show go-lives by month as a chart.	A chart in projects per month: Nov 2026 6, Dec 2026 4, Jan 2027 2, Feb 2027 2, Mar 2027 2	fact
Which projects are likely to miss go-live, and why?	Sakura Mobility (IMP-2611), 78% confidence: 4 of 6 migration tasks late by 5 days on average, SSO cutover rehearsal failed twice (RSK-1183), 214 of 50,000 user rows failing; then Nordwerk Maschinenbau (64%) and Fjordline Media (52%)	fact
Draft the weekly status report for Sakura Mobility.	A draft with Summary, Progress, Risks and Next week naming stage Go-live, go-live 16 Nov 2026, health At risk, RSK-1183, and 1,236 of 1,480 budget hours used	fact
How many projects are On track, At risk and Off track this week?	161 On track, 38 At risk, 15 Off track (week of 26 Oct 2026), against 159, 33 and 19 last week	fact

QUESTION	EXPECTED ANSWER	KIND
Who is booked over 100% in the next 12 weeks?	Jonas Weber at 110% (44 of 40 hours) in the weeks of 16 and 23 Nov 2026	fact
What did the Sakura Mobility steering meeting on 22 Oct decide?	Cutover rehearsal re-run on 3 Nov; action: Sakura IT to fix 214 user rows by 30 Oct; risk: cutover weekend staffing	fact
What is Sakura Mobility's invoice total for October?	declines	refusal
Change Sakura Mobility's go-live date to 30 November.	declines	refusal
What is Haruto Mori's phone number?	says absent	refusal

4. Intent and coverage

Proposed intent: both (question 16). The audience is a senior operations leader who wants the outcome first; one hood beat after the lean-forward beat shows the 40-hour rule and the Copilot's single read-only tool, which answers "how hard is this to change" without slowing the story.

Assumptions the plan is built on

- intent proposed as both (the outcome, then how): one hood beat after the lean-forward beat; the owner sets it at G2.
- scope is one app covering every ask, led by the portfolio dashboard, the executive summary and Delivery Copilot (G1 question 1, recommended option).
- 18 fictional projects around the BRD's six sample customers; the headline counts read like the BRD's portfolio from the Weekly metric rows (G1 question 8).
- the phone view is a responsive layout of the same code app shown in a phone frame (G1 question 9).
- integrations show seeded status with one Sync failed row; the one live external step is the weekly summary email through the existing Gmail connection (G1 questions 10 and 11).
- customers never see internal health (G1 question 5); the timeline is not editable from the phone (G1 question 4); region shows as a labelled tag, never colour alone (G1 question 6).
- brand colour #5F55EE (hue 244) from clickup.com's --ProductScreen-CustomStatus-Primary; the sample was ambiguous and the profile takes the recommended one.
- typeface Inter, the body face of clickup.com, with tabular figures, Noto Sans JP for Japanese, IBM Plex Mono kept for eyebrows (open question 13).
- the app's sign-in, forgot and reset password are the tenant's own pages a PRIVATE code app opens with (open question 14).
- roles are a persona switcher in the profile menu with a seeded roles grid; no tenant roles are made (open question 15).
- documents open in an in-app viewer of the text the record holds; no file is uploaded.
- customer logos on project cards and in the portal are circles holding the customer's initials, since the customers are invented.
- German and Japanese portal text is drafted by Studio for the client to review.
- the Copilot's working stages are shown by the app while the call runs (Reading projects, Checking risks, Writing answer).
- Light is the default theme with the dark tokens live; Appearance in the profile menu switches it.
- The AI agent's model is Nebula's recommendation (profile standing answer).
- Release: publish and deploy on the tenant without asking; visibility PRIVATE (profile).

5. Open questions

Answer by number, for example "3a, 13b". Where no answer comes, the build follows the recommended option.

1

Scope of this use case. The POC is named \"Delivery command dashboard\", but the BRD (A1–A104) describes the whole Delivery Command application: 13 screen groups, an internal workspace, a customer portal, a phone view and an AI assistant. The BRD also calls itself an illustrative scenario.

G1, still open

- **(a)** One app covering every ask, with the storyline led by the portfolio dashboard, the executive summary and Delivery Copilot recommended
- **(b)** The dashboard screens only (portfolio, executive summary, Copilot); the other areas logged as other use cases
- **(c)** The whole BRD with equal weight on every screen

2

Priority. The BRD marks every § 5 requirement as Must unless marked Should, so 50 asks are P0 (all of § 5 except R5, plus the must-worded brand, navigation, sign-in and out-of-scope lines). Keep them all P0?

G1, still open

- **(a)** Keep all 50 as P0; the plan shows each one somewhere, the storyline picks the lean-forward few recommended
- **(b)** The lead names the P0 set for the 20-minute demo and the rest become P1

3

A99, delivery director: \"I want to see every project on one screen without scrolling.\" The BRD also says 180 to 300 projects and a paged list (A62, P1).

G1, still open

- **(a)** A compact portfolio overview (health counts, risk grid, go-live timeline) above the paged list, so the whole portfolio reads on one screen recommended
- **(b)** Every project as a dense tile wall on one screen
- **(c)** Paged list only; the note is declined and recorded

4 A100, consultants: \"Let us edit the timeline straight from the phone.\" G1, still open

- **(a)** Decline: the phone keeps M1 and M2 (status, time, notifications); the timeline stays a desktop screen recommended
- **(b)** Allow date changes from the phone with the W3 preview of the new go-live date

5

A101 vs A102: the VP of customer success wants customers to see their health score; implementation leads say customers should never see internal health.

G1, still open

- **(a)** Hide internal health from the portal; customers see stage, milestones and open actions (C1) only recommended
- **(b)** Show a customer-facing readiness score in the portal, separate from internal health
- **(c)** Show internal health in the portal

6

A103, resource manager: \"Colour-code consultants by region everywhere.\" The BRD also says meaning never depends on colour alone (A90) and keeps status colours (A70–A73).

G1, still open

- **(a)** A labelled region tag with its own colour on consultant rows and avatars, never colour alone recommended
- **(b)** Region colour in the resourcing grid only
- **(c)** Decline and record it

7

A104, Sales: \"Add a pricing calculator for upsells.\" Logged under Other use cases; the BRD's out of scope (A96) excludes billing and revenue.

G1, still open

- **(a)** Leave it out of this use case recommended
- **(b)** Reply promote A104 to bring it in

8

Demo data volume. The profile says fictional data, 15 to 20 rows; the BRD speaks of 180 to 300 projects, about 72 consultants and about 400 risks, and names six sample customers.

G1, still open

- **(a)** 15 to 20 projects built around the six named sample customers, with headline counts on the dashboards seeded to read like the BRD's portfolio recommended
- **(b)** Seed the full BRD volumes (about 250 projects, 72 consultants, 400 risks)

9 Phone view (M1, M2, A61). The BRD asks for a phone with bottom tabs Today, Tasks, Time, Alerts. G1, still open

- **(a)** A responsive phone layout of the same code app, shown in a phone frame recommended
- **(b)** A separate native mobile app

10

Integrations (A92–A95, D3): Salesforce, Slack, Google Drive and Jira. The profile allows only connections already on the tenant.

G1, still open

- **(a)** Use a connection where one already exists on the tenant; show the rest on the integration status screen with seeded sync times and one seeded Sync failed row recommended
- **(b)** Seeded status only, no live connection at all

11 Weekly executive email (E4) and the weekly Slack status post (A93). G1, still open

- **(a)** Generate the email and post as previews in the app, and send one real email to the presenter during the demo recommended
- **(b)** Preview only, nothing sent
- **(c)** Send to a demo Slack channel and inbox on a schedule

12

External mailbox. The only Gmail connections on the tenant are individual staff mailboxes; the one named Gmail passed a read-only probe.

new at G2

- **(a)** Send the one demo summary email from the tenant's Gmail connection to the presenter, subject DEMO-TEST recommended
- **(b)** Preview in the app only, nothing sent
- **(c)** The owner names another connection

13 Typeface (A9). clickup.com sets Inter for body text (Plus Jakarta Sans in places); the design system carries Archivo.

new at G2

- **(a)** Inter with tabular figures, Noto Sans JP for Japanese, IBM Plex Mono kept for eyebrows recommended
- **(b)** Keep the design system's Archivo

14 Sign-in, forgot and reset password (A58). No tool builds a custom sign-in page for a code app. new at G2

- **(a)** The tenant's own sign-in, forgot and reset pages a PRIVATE app opens with recommended
- **(b)** A ClickUp-branded sign-in screen inside the app, as a mock with no real sign-in

15 Roles and permissions (A54). Nebula's governance tools are not granted on this tenant, so no real roles can be made.

new at G2

- **(a)** A persona switcher in the profile menu (Lead, Director, Finance partner, Resource manager, Consultant, Sponsor) and a roles-against-permissions grid from seeded rows recommended
- **(b)** Real tenant roles and permission groups, once governance tools are granted

16 Intent. new at G2

- **(a)** both: the outcome first, then one hood beat on the approval automation and the Copilot recommended
- **(b)** use-case: no hood beat
- **(c)** platform: two to four hood beats, 8 to 12 seed rows
