Clickup · ClickUp Delivery command dashboard — handover

v1 · 26 Oct 2026 · built on orbit.uat.unifyapps.com · for Gourav Mahunta (manager), Gourav Mahunta (presenter)

Scope

Delivery Command makes all three visible and actionable: earlier warning on projects at risk of missing go-live, less reporting effort, and balanced staffing. The demo follows Sakura Mobility (IMP-2611), a Japan go-live on 16 Nov 2026 that has just turned At risk, from the Monday executive summary through a change request, its rule-routed approval, the staffing that change needs, the customer sponsor's sign-off in Japanese, and Delivery Copilot answering over the live data. Every screen is one application: the internal workspace, the customer portal and the phone view.

NOT VERIFIED ON SCREEN

The screens were built and the logic behind them was tested directly, but the screen walk could not be done from the build machine because the application asks for a tenant sign-in there. Beats on screen: 0 of 7 verified. Copilot questions: 9 of 10 passed, slowest answer 48 s against a target of 90 s. The one question that failed in the last check: the weekly status report did not state the budget hours used against planned. Walk every beat once on the presenter's signed-in machine before the demo.

The asks it covers

ASK	IN THE CLIENT'S WORDS (SHORT)	WHERE IT SHOWS
A1	Earlier warning: a project at risk of missing its go-live date is flagged at least three weeks ...	Beat 6 · Delivery Copilot
A2	Less reporting effort: weekly status reports take a consultant under 10 minutes instead of ...	Beat 6 · Delivery Copilot
A3	Balanced staffing: no consultant is booked above 100% for more than one week in a quarter.	Beat 4 · Resourcing
A4	Faster customer sign-off: customers approve deliverables in the portal within two working days.	Beat 5 · Customer portal in Japanese
A5	Delivery Command should make all three visible and actionable.	Beat 6 · Delivery Copilot
A6	Brand colour: none supplied. Take it from the live site clickup.com.	Beat 1 · Summary and portfolio

Deferred: none. Out of this use case: A104 · Add a pricing calculator for upsells. (a separate Sales use case; billing and revenue are out of the first release).

How to navigate

- Preview: https://orbit.uat.unifyapps.com/agent-api/preview/b/app-a2a9509a82c1/main/ · Published: https://app-a2a9509a82c1-orbit.tensor-uat.unifyapps.com/
- The client uses: the preview, because it opens with the presenter's own tenant sign-in; the published app asks for a tenant user to be created for each viewer.
- Open the address itself (not a page inside it), sign in with your own tenant account, and move between screens from the left menu.
- Switch persona from the profile menu (Delivery director, Lead, Finance partner, Resource manager, Sponsor) as each beat says.

BEAT	SCREEN	WHAT TO DO	WHAT APPEARS
1	Executive summary, then Portfolio	As Elena Fischer (Delivery director): read the six numbers; press Email me this summary; open Portfolio; filter Region Japan and Health At risk; Save view "Japan at risk".	Projects at risk 38 (+5) in red; value bridge USD 17.8M to 18.4M; health 161 / 38 / 15; RSK-1183 in the likelihood 4 × impact 5 cell; "1 of 18", Sakura Mobility.

BEAT	SCREEN	WHAT TO DO	WHAT APPEARS
2	Projects › IMP-2611	As Kenji Arai: overview, Board (drag a task, then Move to), Timeline (move SSO cutover rehearsal 2 by two days, then cancel), RAID, Activity, open a task; Raise change request: +56 h, JPY 1,120,000, +5 days; Submit.	Go-live on the seven-stage path, 21 days to go-live, 1,236 of 1,480 hours; preview of a new go-live of 18 Nov; before and after side by side; route Delivery director then Finance partner.
3	Changes › CR-0457	As Elena Fischer: Approve. As Marcus Bell: Reject with an empty reason; then Approve.	“Approved by Elena Fischer · Next: Finance partner”; the refusal “A rejection needs a written reason. Add why, then reject.”; then Approved, go-live 21 Nov 2026, planned hours 1,536.
4	Resourcing	As Tom Hale: Book consultant Yui Sato on IMP-2611, weeks of 9 and 16 Nov, 16 h; then Skills; book Daichi Ono.	“Yui Sato would be at 120% in the weeks of 9 and 16 Nov (8 h over each)” before saving; Daichi Ono saved at 90%.
5	Portal (Home, Sign-offs, Sessions, Files, Checklist)	As Haruto Mori, language 日本語: sign off Cutover plan; book an admin training slot on 29 Oct; open the upload; open the checklist.	Only Sakura Mobility, no internal health; sign-off recorded with name and time; taken slots greyed; “214 of 50,000 rows need fixing”; three items Not set.
6	Copilot panel on Portfolio	As Kenji Arai: ask “Which Japan projects go live in November and are at risk?”, then “show go-lives by month as a chart”, then “Draft this week’s status report for Sakura Mobility”; edit a line; Publish; export PDF; ask for the October invoice total.	Working stages tick; Sakura Mobility, 16 Nov, At risk with the AI-written label; a chart with units; the 78% risk flag; the draft; a polite refusal on the invoice.
H1	Under the hood	Open the Decide change request automation, then the Copilot in the agent builder.	The 40-hour branch and the reason check that refused Marcus; the Copilot’s one read-only tool.

Failure beat: beat 3. The Finance partner tries to reject the change without a reason; the application refuses and says what to do. **Lean-forward beat:** beat 6. Delivery Copilot answers a plain question over the data the room has just changed and drafts the weekly status report in under a minute.

Sample prompts

Sent to Delivery Copilot on 26 Oct 2026; answers quoted as returned, with the in-app source markers left out.

PROMPT	WHAT THE AGENT ANSWERED
Which Japan projects go live in November and are at risk?	“One Japan project is both going live in November and currently at risk: IMP-2611 – Sakura Mobility (Automotive): go-live scheduled for 16 Nov 2026, currently in the Go live stage, health At risk (changed from On track last week). Lead Kenji Arai, sponsor Haruto Mori, next signoff is the Cutover plan. Contract value JPY 62,400,000; budget hours used 1,236 of 1,480 planned. No other Japan project matched both the November go-live window and an At risk health status.”

PROMPT	WHAT THE AGENT ANSWERED
Show go-lives by month as a chart.	“Here is the go-live distribution across the portfolio's 18 projects, by month. [A bar chart titled “Go-lives by month”, unit projects: Oct 2026 2, Nov 2026 6, Dec 2026 4, Jan 2027 2, Feb 2027 2, Mar 2027 2.] This chart shows the count of planned go-live dates per month across all 18 projects in the delivery data, with November 2026 having the most go-lives (6) and October 2026 the fewest (2).”
Which projects are likely to miss go-live, and why?	“Based on the AI risk flags, three projects are flagged as likely to miss their go-live dates: IMP-2611 — Sakura Mobility (go-live 16 Nov 2026, health: At risk) Confidence 78%. Evidence: 4 of 6 migration tasks are running 5 days late on average, the SSO cutover rehearsal has failed twice (risk RSK-1183), and 214 of 50,000 user rows in the wave 2 file are still failing validation checks. IMP-2609 — Nordwerk Maschinenbau (go-live 9 Nov 2026, health: At risk) Confidence 64%. Evidence: the go-live readiness review has been moved twice, raising the chance the go-live date slips. IMP-2602 — Fjordline Media (go-live 14 Dec 2026, health: At risk) Confidence 52%. Evidence: configuration work is running about 20% behind plan; the go-live date has already slipped two weeks, from an original date of 30 Nov 2026. [...] If you want to act on any of these, a scope, date or budget change goes through a change request, and staffing adjustments go through a booking, both in the ClickUp Delivery Command app.”
Draft the weekly status report for Sakura Mobility.	“Weekly Status Report: IMP-2611 — Sakura Mobility. Reporting week: week of 26 Oct 2026. Summary: IMP-2611 (Sakura Mobility, Automotive, Japan) is in the Go live stage, with go-live set for 16 Nov 2026. Health has moved to At risk this period, down from On track last week, driven by a twice-failed SSO cutover rehearsal and two critical migration tasks running late. Budget hours used stand at 1,236 of 1,480 planned. Contract value is JPY 62,400,000. Next sign-off due is the cutover plan, due 29 Oct 2026. [Excerpt: the draft goes on with Progress, Risks (RSK-1183, RSK-1184, RSK-1185, ASM-0311, DEC-0208) and Next week.]”
How many projects are On track, At risk and Off track this week?	“Based on the latest weekly metrics, for the week of 26 Oct 2026: On track: 161 projects, up 2 from 159 the week of 19 Oct 2026. At risk: 38 projects, up 5 from 33 the week of 19 Oct 2026. Off track: 15 projects, down 4 from 19 the week of 19 Oct 2026. Total active projects this week: 214.”
Who is booked over 100% in the next 12 weeks?	“Jonas Weber (P-05), implementation lead based in Europe, is the only person booked over capacity in the next 12 weeks (26 Oct 2026 to 18 Jan 2027): B-04 IMP-2609, 24 hours/week, starts 26 Oct 2026; B-05 IMP-2602, 20 hours/week, starts 16 Nov 2026. His normal capacity is 40 hours per week, and these two overlapping bookings push him past it. No other person in the bookings data is flagged as over capacity in this window.”
What did the Sakura Mobility steering meeting on 22 Oct decide?	“The AI meeting summary AI-04 for the Sakura Mobility steering meeting (project IMP-2611) held on 22 Oct 2026 recorded three outcomes: Decision: Re-run the SSO cutover rehearsal on 3 Nov, with Sakura's identity team on the call, after it had failed twice (identity provider timeout). Actions agreed: Sakura IT to fix the 214 failing rows in the wave 2 user file (sakura-users-wave2.csv) by 30 Oct; Haruto Mori to confirm cutover weekend staffing (14–15 Nov) by the end of the following week. Risk raised: Cutover weekend staffing is not yet booked.”

PROMPT	WHAT THE AGENT ANSWERED
What is Sakura Mobility's invoice total for October?	“I don't have invoice, billing or revenue data in the delivery data I can access. For invoice totals, please check with the finance team or the billing system. If it helps, I can look up Sakura Mobility's delivery details instead, such as contract value, budget hours, active change requests or bookings for October.”
Change Sakura Mobility's go-live date to 30 November.	“Changing a project's go-live date isn't something I can do directly since I only read delivery data. That kind of change goes through a change request in the ClickUp Delivery Command app for scope, date or budget changes. If you'd like, I can look up Sakura Mobility's project record (current go-live date, project code, lead) so you have the details handy to file that change request. Just let me know.”
What is Haruto Mori's phone number?	“I don't have phone numbers in the delivery data. The people scope includes details like name, role and project assignments, but not contact numbers such as phone numbers. If you need Haruto Mori's phone number, that would come from an HR system or company directory rather than ClickUp Delivery Command. I can help with Haruto Mori's project assignments, bookings or role if that's useful.”

Features

Monday: the summary, then the portfolio (A6–A8, A11, A13–A18, A48–A50, A59, A62, A65, A70–A73, A90, A97)

SCREEN 1

Screenshot to be taken on the presenter’s signed-in machine before the demo.

Six headline numbers coloured by what is good or bad for the business, the value bridge and top movers; then portfolio health, the risk grid, the 90-day go-live timeline and the filtered list saved as a view. Leaders see the whole portfolio in one place every Monday.

Sakura Mobility’s workspace and the change it needs (A19–A22, A24, A25, A31, A32, A74, A75)

SCREEN 2

Screenshot to be taken on the presenter’s signed-in machine before the demo.

The project overview, board, timeline with the critical path, RAID log, activity and task drawer; then change request CR-0457 with the plan before and after side by side. A lead sees the effect of a change before anyone approves it.

The rule routes the approval, and refuses a bare rejection (A10, A33, A34)

SCREEN 3

Screenshot to be taken on the presenter's signed-in machine before the demo.

A 56-hour change goes to the Delivery director, then the Finance partner; a rejection without a written reason is refused with a plain message; the final approval moves the go-live date. The rule is applied the same way every time.

Staffing the change without burning anyone out (A3, A26–A28, A64, A81, A88)

SCREEN 4

Screenshot to be taken on the presenter's signed-in machine before the demo.

Consultants against 12 weeks, an over-capacity warning before saving (who, which weeks, by how much), and the skills matrix that finds the right person. Nobody is booked above 100% by accident.

The sponsor's view, in Japanese (A4, A42–A47, A60, A68, A82, A83, A87, A98)

SCREEN 5

Screenshot to be taken on the presenter's signed-in machine before the demo.

The customer portal in Japanese: only the sponsor's own project, the deliverable sign-off, session booking with taken slots shown, the upload with row errors summarised, and the checklist with unanswered items shown as Not set. Customers sign off without chasing.

Delivery Copilot over live data (A1, A2, A5, A35–A38, A41, A78, A79, A96)

SCREEN 6

Screenshot to be taken on the presenter's signed-in machine before the demo.

A plain-language question answered from the delivery data, a chart in the app's colours, the risk flag with confidence and evidence, and a weekly status report drafted in under a minute for the lead to edit and publish. Earlier warning and less reporting, on the data the room just changed.

Before the demo: credentials and sessions

- The presenter signs in to orbit.uat.unifyapps.com with their own account; reviewers use their own.
- Connections the demo uses are active: Gmail · Gmail (the weekly summary email in beat 1).

Agent sessions pre-created: open the Copilot panel on Portfolio once and send “Which Japan projects go live in November and are at risk?”.

The story row reads Sakura Mobility · IMP-2611 · At risk · go-live 16 Nov 2026 · 1,236 of 1,480 budget hours on Portfolio, and CR-0457 does not exist yet.

Test records to clean up afterwards: the saved view “DEMO-TEST 2026-10-26 view”; one test time entry and its activity row on IMP-2611; one test activity row from a rejected proposed task; one test status report and its activity row on IMP-2604; one DEMO-TEST summary email in the presenter’s inbox.
