ClickUp PLAN · VERSION 1 · ROUND 1

ClickUp Delivery Command: the plan

Client ClickUp · use case ClickUp Delivery command platform · 23 Oct 2026 · POC lead and manager Gourav Mahunta · tenant orbit.uat.unifyapps.com

Storyline	**Every implementation visible and actionable** (A1): 7 beats, 2 hood beats
Size	18 pages, 21 objects, 18 automations, 1 AI agent; about 108 tasks, **11 Nebula plans** (reference 4 · 3 · 3 · 1)
Proposed intent	both (question 13)
Open questions	17: 12 from G1, still open and followed as recommended; 5 new
Look	ClickUp #5F55EE (hue 244) on the design system; ClickUp's own logo

1. Storyline

The presenter sits in the delivery director's seat. Every beat revolves around one story row.

STORY ROW

IMP-2611 · Sakura Mobility · Japan · stage Data migration (4 of 7) · go-live 19 Nov 2026 (baseline 12 Nov, slipped; 26 Nov after CR-0457) · At risk · lead Mei Takahashi · 1,200 seats · JPY 84,000,000 · 860 h planned, 545 h used (912 planned after CR-0457) · open risks RSK-1183 (likelihood 4, impact 5), RSK-1184, RSK-1185, RSK-1186 · late critical tasks TSK-5024, TSK-5025 · Data migration column 17 tasks · next sign-off SGN-302 Migration plan v2 · sponsor Hana Mori (portal in Japanese) · CR-0457 +52 h, ¥1,560,000

BEAT	THE PRESENTER DOES · THE SCREEN SHOWS · ASKS
1 · Portfolio at a glance `/SIGNIN → /PORTFOLIO` live (sign-in mocked)	**Does:** Signs in as Elena Brooks, delivery director, on the ClickUp sign-in screen; filters the project list to Japan and At risk, removes a chip, clicks the RSK-1183 cell of the risk grid, saves the view "Japan · at risk" for the team. **Shows:** 12 On track (−1), 4 At risk (+1), 2 Off track (0) since last week; the likelihood-by-impact grid with RSK-1183 at 4 × 5; the 90-day go-live timeline by region with IMP-2611, IMP-2604 and IMP-2631 marked slipped; on-track share 88% to 67% over 12 weeks; "2 of 18" with removable chips and Clear all; IMP-2611 Sakura Mobility At risk, go-live 19 Nov 2026. `ASKS: A1, A2, A3, A4, A7, A9, A10, A11, A12, A13, A14, A55, A56, A57, A61, A64, A69, A70, A71, A72, A73, A75, A86, A90, A96, A98, A99, A100, A109`
2 · Inside IMP-2611 `/PROJECTS/IMP-2611` live	**Does:** Opens IMP-2611; switches overview, board, list and timeline; moves TSK-5035 SSO user mapping to Integrations from the Move to menu; opens TSK-5024 beside the list; drags Validate custom fields mapping two days later on the timeline and cancels after the preview. **Shows:** Stage 4 of 7 on the progress path, 27 days to go-live, 545 of 860 hours, 4 open risks, next sign-off Migration plan v2; the Data migration column at 17 of 15 with its warning; task detail with description, assignee, dates, time logged, comments and attachments; the critical path and the preview "go-live moves to 23 Nov 2026" before saving; RAID log with history; the statement of work in the in-app viewer; the activity feed with the move just made. `ASKS: A15, A16, A17, A18, A19, A20, A21, A62, A89`

BEAT	THE PRESENTER DOES · THE SCREEN SHOWS · ASKS
3 · Staff it without overbooking `/RESOURCING → /TIMESHEETS` live	**Does:** As Grace Liu, resource manager: filters the skills matrix to Japanese and data migration at level 4, books Aiko Tanaka on IMP-2611 for 16 hours in the weeks of 16 and 23 Nov, reads the warning, changes it to 10 hours and saves; approves eight pending timesheets in one batch and returns Haruto Sato's with a reason. **Shows:** 13 people against 12 weeks with Haruto Sato at 110% in the week of 2 Nov flagged; region as a labelled chip; the warning before saving: "Aiko Tanaka, week of 16 Nov: 46 of 40 h, 115%, 6 h over"; booked against capacity by region for the quarter; the batch approval and the required return reason. `ASKS: A22, A23, A24, A25, A26, A63, A66, A81, A88, A105, A113`
4 · The change that routes itself (failure beat) `/CHANGES/NEW → /CHANGES/CR-0457` live	**Does:** As Mei Takahashi, raises CR-0457 on IMP-2611: SSO and SCIM provisioning, +52 hours, ¥1,560,000, go-live 19 to 26 Nov; checks the plan before and after; submits. As Elena Brooks approves. As Tomás Herrera, finance partner, clicks Reject with no reason, then approves. **Shows:** The side-by-side plan with three added tasks and the moved go-live marked; the route "Delivery director, then finance partner" because 52 is 40 hours or more; the stepper with who approved and who is next; the refusal "A rejection needs a written reason. Add one and reject again."; after approval the go-live 26 Nov 2026, 912 planned hours and two activity entries. `ASKS: A6, A27, A28, A29, A30`
5 · The Monday summary `/EXECUTIVE` deterministic figures; live email automation	**Does:** Opens the weekly summary tab; reads the six numbers; sends a test of the Monday 08:00 email. **Shows:** Active projects 18 (+1), go-lives this month 1 (0), projects at risk 6 (+1, red although up), average days to go-live 59.8 (+2.7, red), utilisation 72% (+2), contract value awaiting go-live this quarter USD 4,468,380; the bridge from USD 5,502,380 last month: +184,800 new, −658,800 completed, −410,000 slipped, −150,000 cancelled; the five biggest movers with their reasons; the email preview with the ClickUp logo. `ASKS: A45, A46, A47, A48, A107`

BEAT	THE PRESENTER DOES · THE SCREEN SHOWS · ASKS
6 · The sponsor's side /PORTAL live	**Does:** Switches to Hana Mori, Sakura Mobility's sponsor; the portal opens in Japanese; signs off Migration plan v2; books a training slot on 4 Nov; uploads the sample 50,000-row user list, fixes two rows and confirms; opens the checklist; switches to German; opens a link to IMP-2604. **Shows:** Only IMP-2611: stage, milestones, sessions, open actions, shared documents, no internal health; the sign-off recorded with who and when; taken slots visible but not choosable; "214 of 50,000 rows need fixing" summarised by error type; 7 of 10 checklist items set and 3 Not set; German labels that fit; "You do not have access to IMP-2604. Daniel Ortiz, the project lead, can grant it." ASKS: A4, A5, A39, A40, A41, A42, A43, A44, A59, A65, A67, A68, A74, A82, A83, A84, A87, A106, A108, A112
7 · Ask Delivery Copilot (lean-forward) COPILOT PANEL ON /PORTFOLIO live agent; seeded risk flags, meeting summary and proposed tasks	**Does:** As Elena Brooks opens the Copilot panel, picks no suggestion and types "Which Japan projects go live in November and are at risk?"; asks for go-lives by month as a chart; opens the risk flags; asks it to draft the weekly status report for IMP-2611, edits a line and publishes it as PDF; opens the 22 Oct meeting summary and accepts two of its three proposed tasks; asks for Sakura Mobility's invoice total. **Shows:** Three suggested questions from her projects; the stages while it works; IMP-2611 and IMP-2633 with links in an AI Insight card labelled AI-written; a bar chart in go-lives per month; IMP-2611 flagged High with its evidence, raised 28 days before go-live; the status report draft; summary points linked to transcript times; two new tasks on the board; a plain refusal saying billing is not in Delivery Command and what to ask instead. ASKS: A31, A32, A33, A34, A35, A36, A37, A38, A58, A78, A79, A97, A103, A104
H1 live	After beat 4: open Delivery Command · Change request in the automation canvas: the 40-hour branch, the second approver and the empty-reason refusal
H2 live	After beat 7: open Delivery Command · Copilot in the agent builder: its instructions, its one read-only tool Read delivery data, its model

LEAN-FORWARD MOMENT: BEAT 7 · ALTERNATIVES CONSIDERED: B / C

	ALTERNATIVE	WHY NOT
B	The change request routing to the finance partner as the closing moment	strong, but it is a rule the audience saw in beat 4
C	Hana Mori's Japanese sign-off landing in Mei Takahashi's notifications live	quick and quiet; it shows plumbing, not judgement
7	Ask Delivery Copilot (chosen)	The profile's show-off line names an AI assistant over live data, and the delivery director's daily question is the first one asked.

FAILURE BEAT: BEAT 4, A REJECT WITH NO WRITTEN REASON IS REFUSED

AI SURFACES AND OTHER MODES

SURFACE	MODE
Copilot answers (Delivery Command · Copilot)	live
Chart answers	live
Status report draft	live, seeded fallback AIO-07
Three suggested questions	deterministic (from the persona's projects, not shown as AI)
Stages while it works	deterministic (timed while the live call runs)
Risk flags with confidence and evidence	seeded (AIO-01, AIO-02)
Meeting summary with transcript links	seeded (AIO-03)
Proposed tasks	seeded (AIO-04 to AIO-06); Accept and Reject are live
Sign-in, forgot and reset password, persona switch	mocked
Integration status (Salesforce, Slack, Google Drive, Jira)	mocked: seeded rows
Executive summary figures	deterministic

SURFACE	MODE
Customer upload validation	deterministic (in the app)
Every demo-path action	live automation that writes

2. What gets built

KIND	NAME	FOR	BEATS
Object	Delivery Command · Project	the implementation, story row IMP-2611	1–7
Object	Delivery Command · Task	plan, board, timeline, phone	2, 4, 7
Object	Delivery Command · RAID item	risk grid and RAID log	1, 2, 7
Object	Delivery Command · Person	consultants, leads, director, finance, sponsors	3, 4, 6
Object	Delivery Command · Booking	resourcing grid and bookings	3
Object	Delivery Command · Time entry	timesheets and phone time	3
Object	Delivery Command · Change request	CR-0457 and its route	4
Object	Delivery Command · Activity	feed and audit log	2, 4, 5
Object	Delivery Command · Document	library and viewer	2, 6
Object	Delivery Command · Session slot	training booking	6
Object	Delivery Command · Sign-off	stage sign-offs	2, 6
Object	Delivery Command · Checklist item	readiness checklist	6
Object	Delivery Command · Notification	bell and phone alerts	controls
Object	Delivery Command · Integration	integration status	controls

KIND	NAME	FOR	BEATS
Object	Delivery Command · Saved view	shared filters	1

CAPABILITY CHECK

CONTRACT LINE	BEAT	BUILDER	READ THAT PROVES IT	RESULT
21 object · create lines	1–7	fde-agent	get_objects	ok
19 record · seed lines (largest 168 rows, a named file under 200)	1–7	fde-agent	get_records	ok
17 callable automations	1–7	automation-agent	describe_callable_workflow, trigger_workflow_run then inspect_workflow_run	ok

CONTRACT LINE	BEAT	BUILDER	READ THAT PROVES IT	RESULT
Weekly executive email schedule (scheduled trigger)	5	automation-agent	search_workflows (deployment)	ok
Send executive summary: the send step	5	automation-agent	the Executive email row; the sent message	no tool for a team mailbox: question 15 (preview row meanwhile)
Ask Copilot: Invoke Agent (ai_agents_by_unifyapps, no connection)	7	automation-agent	trigger_workflow_run with question 1 of the eval	ok
Delivery Command · Copilot	7	agent-builder	get_agent, send_test_messages with the 11 eval rows	ok
Code app create and 11 updates	1–7	code-app-agent	get_code_app head.sha, bindings.ts FETCH id, callables.ts blocks	ok
Publish ClickUp Delivery Command	all	code-app-agent	deployed with commitHash	ok
Real per-user sign-in and platform roles	1, 6	none	—	no tool: question 16 (persona switch meanwhile)
Document files	2, 6	fde-agent	—	worked around: the viewer pages each document's body text

3. Data

Source: assumed, shaped like ClickUp's delivery operations (BRD §7, §8). Every row is fictional, written to 19 seed files; nothing is masked because nothing is real. Emails use .example domains. Money stays in the contract currency; portfolio totals use USD at EUR 1.08 and JPY 0.0066.

ENTITY	ROWS	HOW
Project	19	named seed rows
Task	96	seed file, under 200
RAID item	17	named seed rows
Person	18	named seed rows
Booking	168	seed file, under 200
Time entry	63	seed file, under 200
Change request	2	named seed rows
Activity	20	named seed rows
Document	6	named seed rows
Session slot	12	named seed rows
Sign-off	4	named seed rows
Checklist item	10	named seed rows
Notification	6	named seed rows
Integration	4	named seed rows
Saved view	2	named seed rows
Weekly snapshot	12	named seed rows
Weekly metric	1	named seed rows
AI output	7	named seed rows
Role permission	6	named seed rows
Upload	0	live writes only

ENTITY	ROWS	HOW
Executive email	0	live writes only

The 50,000-row customer upload (214 bad rows) is generated in the portal by Use sample file, so no large file is stored. Expected answers: 11 rows in the eval file (8 facts, 3 refusals), each checked against a seed row or a rule.

4. Intent and coverage

Proposed intent: both. The profile wants delivery status, rule-routed approvals and an AI assistant: the outcome for the operations leader, then two hood beats that open the 40-hour rule and the agent to show how little it takes to change.

COVERED BY	ASKS
A beat (92)	A1, A2, A3, A4, A5, A6, A7, A9, A10, A11, A12, A13, A14, A15, A16, A17, A18, A19, A20, A21, A22, A23, A24, A25, A26, A27, A28, A29, A30, A31, A32, A33, A34, A35, A36, A37, A38, A39, A40, A41, A42, A43, A44, A45, A46, A47, A48, A55, A56, A57, A58, A59, A61, A62, A63, A64, A65, A66, A67, A68, A69, A70, A71, A72, A73, A74, A75, A78, A79, A81, A82, A83, A84, A86, A87, A88, A89, A90, A96, A97, A98, A99, A100, A103, A104, A105, A106, A107, A108, A109, A112, A113
A control on a beat screen (19)	A8, A49, A50, A51, A52, A53, A54, A60, A76, A77, A80, A85, A91, A92, A93, A94, A95, A101, A102
An open question (2)	A110 (question 2), A111 (question 1)
Out of scope	A114, another use case (question 5)

CONTROL	WHERE	MODE
A8	Appearance Light or Dark in the profile menu, every screen	light default
A49	Phone view in the profile menu: /m Today and Time tabs, log time in three taps	live
A50	Notifications bell in the top bar and the phone's Alerts tab, mark read or open	live
A51	Admin › Roles: roles against permissions grid	seeded

CONTROL	WHERE	MODE
A52	Admin › Audit log, filtered by person, project and action, read only	live read
A53	Admin › Integrations: last sync and error per system	mocked
A54	Admin › Projects: settings edited in place with unsaved, saving, saved, failed	live
A60	Phone view bottom tabs Today, Tasks, Time, Alerts	live
A76	Persona switch to Marcus Bell: "Projects appear here once a lead assigns you" on Portfolio	live read
A77	Portfolio filters with no match: "No rows match your search and filters" with Clear all	live read
A80	Admin › Integrations: Jira Sync failed since 06:40 UTC, 3 escalations affected	mocked
A85	Profile menu › Preview session timeout: "Your session ends in 2 minutes. Stay signed in"	deterministic
A91	Appearance switch, both themes on the kit's measured tokens	—
A92	Admin › Integrations Salesforce row and the IMP-2646 "created from won deal" feed entry	mocked
A93	Admin › Integrations Slack row	mocked
A94	Project › Documents source label Google Drive; Admin › Integrations row	mocked
A95	Project › RAID: RSK-1184 linked to ENG-4821; Admin › Integrations Jira row	mocked
A101	No call or recording control anywhere; Copilot declines	—
A102	Phone view has no offline mode or offline wording	—

5. Open questions

Questions 1 to 12 came with G1 and are still open; the plan follows each recommended option. Questions 13 to 17 are new.

NO.	QUESTION	OPTIONS
1	Customer health in the portal (A111 against A112) BEAT 6 SHOWS NO HEALTH.	(a) Portal shows no internal health; stage, milestones and open sign-offs only recommended (b) A customer-facing health score, separate from the internal one (c) The internal health as it is
2	Phone editing of the timeline (A110) THE PHONE VIEW HAS NO TIMELINE.	(a) Phone stays at today, task status, time and alerts; timeline edits on desktop recommended (b) A simple date change for one task on the phone, with the go-live preview (c) Full timeline editing on the phone
3	Every project on one screen (A109 against paging, A61) BEAT 1 IS BUILT THIS WAY.	(a) Portfolio opens on counts, risk grid and timeline that fit one screen; the paged list sits below recommended (b) A compact one-row-per-project list with no paging (c) The paged list only
4	Region colours (A113 against A90) BEAT 3 USES THE CHIP.	(a) Region as a labelled chip with a colour on resourcing and portfolio, never colour alone recommended (b) Region colour on every screen, each with a label (c) No region colours
5	Sales' pricing calculator (A114) NOT BUILT.	(a) Out of scope; listed under other use cases recommended (b) Promote it (reply promote A114) as a simple calculator screen
6	Integrations (A53, A92 to A95) SEEDED; THE EXTERNAL STEP IS HELD. THE TENANT HAS ACTIVE SALESFORCE, JIRA AND SLACK CONNECTIONS OWNED BY OTHER TEAMS AND NO GOOGLE DRIVE ONE; WITH (B) THE CANDIDATE IS A JIRA ESCALATION FROM RSK-1184.	(a) Seeded status rows (one Sync failed) and a seeded won-deal event; no live connection recommended (b) Live connections where they exist on orbit.uat, seeded for the rest (c) Client sandbox credentials

NO.	QUESTION	OPTIONS
7	Logo (A3) DONE: CLICKUP'S NAV WORDMARK AND ITS MARK, SAVED AS PUBLISHED.	(a) The official logo from clickup.com, listed in the G2 pack recommended (b) A text wordmark placeholder
8	Phone view (M1, M2, bottom tabs) ROUTE /M.	(a) A phone-width route in the same code app, shown in a phone frame recommended (b) A separate mobile app
9	Portal languages (A44, A87) BEAT 6 SWITCHES JAPANESE AND GERMAN.	(a) Full switch on every portal screen with translated seeded text and local formats recommended (b) English portal with a switch on the home screen only
10	Data volume (BRD §7) SEEDED AS (A): 19 PROJECT ROWS INCLUDING ONE CANCELLED.	(a) 18 projects with the six BRD customers, 13 consultants, enough risks to fill the grid, a generated 50,000-row upload with 214 bad rows recommended (b) BRD volumes (about 200 projects) (c) Profile minimum only
11	Finance partner (S3) TOMÁS HERRERA, BEAT 4.	(a) A seeded finance partner user the presenter switches to recommended (b) The presenter approves both steps as the director
12	Weekly executive email (E4) BUILT AS (A); WHICH MAILBOX SENDS IT IS QUESTION 15.	(a) Scheduled automation built; the demo triggers one run to the presenter's inbox recommended (b) Email preview page only, no send

NO.	QUESTION	OPTIONS
13	Intent: what should the audience leave with? PROPOSED: THE SHOW-OFF LINE MIXES DELIVERY OUTCOMES WITH THE PLATFORM'S ROUTING AND AI.	(a) both: the outcome first, then two hood beats (the change-request automation, the Copilot agent) recommended (b) use-case: no hood beats (c) platform: two to four hood beats and a description on every node and field
14	Typeface (A5): the BRD asks for the live site's; clickup.com uses Inter (body) and Plus Jakarta Sans (headings), the design system ships Archivo and IBM Plex Mono ONLY THE FONT IMPORT LINE CHANGES; SIZES AND WEIGHTS STAY.	(a) Inter for body and headings from Google Fonts, IBM Plex Mono kept for table heads, tabular numbers, Noto Sans JP for Japanese recommended (b) Archivo as the design system ships, with tabular numbers and Noto Sans JP (c) Inter body with Plus Jakarta Sans headings
15	Executive email sender (A48): no mailbox connection on the tenant belongs to this team THE PLAN USES (A).	(a) Build and schedule it; until a mailbox is named it saves a preview the summary screen shows, and the test send waits recommended (b) Name an existing Gmail connection on orbit.uat to send from (c) Preview only, no schedule
16	Accounts and roles (A39, A51, A84): real per-user sign-in and platform roles need governance tools not granted to Nebula yet SPONSORS SEE ONLY THEIR PROJECT THROUGH THE APP'S OWN RULE.	(a) A persona switch stands in for sign-in; the app enforces each role's rows and actions and shows the grid recommended (b) Real tenant users and roles made by hand by the owner after the build (c) Grid only, no enforcement

NO.	QUESTION	OPTIONS
17	An earlier build of this demo exists on the tenant outside this solution ("ClickUp DC ·" and "DC" objects, eight automations, three Copilot agents) THE PLAN USES (A); NOTHING EARLIER IS CHANGED.	(a) Build fresh under "Delivery Command ·" names in this solution and leave the earlier entities untouched recommended (b) Reuse the earlier "ClickUp DC ·" objects and automations

Assumptions to check

ASSUMPTION
Proposed intent both (the outcome first, then 2 hood beats); the owner sets it at G2.
G1 open questions 1 to 12 are unanswered; the plan follows each recommended option (portal shows no internal health; phone stays at today, status, time and alerts; portfolio opens on one screen with the paged list below; region as a labelled chip; A114 out of scope; integrations seeded; the official logo; a phone-width route; full portal language switch; 18 seeded projects and 13 consultants with a generated 50,000-row upload; a seeded finance partner; a scheduled email with one test run).
The brand colour #5F55EE (hue 244) is brand-sample's recommendation among 14 candidates (profile standing answer for an ambiguous colour).
The logo is ClickUp's own nav wordmark from clickup.com, saved as published; the script's first pick was the ClickUp Brain mark and was replaced.
The seven stage names (Kickoff, Discovery, Configuration, Data migration, Integrations, Training, Hypercare) and the persona names are assumed; the BRD's own stage names are not in the state file.
Earlier "ClickUp DC ·" and "DC" objects, automations and agents exist on the tenant outside this solution; this build uses new "Delivery Command ·" names and touches none of them.
The executive email sends only on a mail connection the owner names; until then Send executive summary stores a preview row.
Sign-in, forgot and reset password screens and the persona switch stand in for real accounts, which need governance tools not granted yet.
Word export of the status report is an HTML document saved as .doc from the app; PDF is the browser's print to PDF.

ASSUMPTION
The code app name ClickUp Delivery Command is free; if taken, the name gets the suffix "· Demo".
All seed rows are fictional; customer names follow the BRD's six invented customers plus twelve more invented names.
