ClickUp Delivery command platform: requirements

Client Clickup · version 1 · round 1 · harvested 23 Oct 2026 · POC lead and manager Gourav Mahunta

1. Summary

Use case	ClickUp Delivery command platform: one application where ClickUp's enterprise implementation team plans, staffs and reports on every customer implementation, customers follow and sign off their rollout in a portal, and an AI assistant writes the routine status work.
Asks added	114 in all: 64 P0, 49 P1, 1 out of scope (another use case)
Why P0	The BRD says every requirement in §5 is a Must for the first release unless marked Should, §9 lists situations the screens must handle and §12 says the application must not suggest the excluded items. Brand inputs, navigation, data volumes, status words, accessibility, integrations, success measures and stakeholder notes are P1.
Not asks	The personas (§4) and the six invented sample customers (§8: Halden Freight, Corvia Health, Brightmoor University, Kestrel Energy, Sakura Mobility, Ostrander Retail) are context for seed data. The four outcomes in §1 restate the §13 success measures (A103 to A108).

Sources read

Source	Result
#clickup-test-3 channel, all messages (6) and the kickoff thread (7 replies)	read; no asks in the messages themselves, only the use case name and the manager
ClickUp-Delivery-Command-BRD.pdf, Slack file F0CA4HW01MX, 9 pages, posted 2026-10-23	read in full from Slack on the first attempt; also matches the POC row's input document
POC Studio input documents (psl_document, type input): 1 row	read; content already filled, no Read input file run needed
Feedback tickets (psl_feedback)	read; none for this POC
Gmail	read; no thread names Clickup, the use case or the clickup.com domain

Sources not read

Source	Why
Google Calendar	not read: not connected (the connector needs the person to sign in again)
Call recordings and transcripts	not read: none shared in the channel; no Drive or Meet tools in this session, and Calendar was unreadable, so whether any client call happened is unknown

Size hint (a flag, not a budget)

Kind	Count	Asks behind it
Objects	about 20	Project, customer (A9, A39); task with dependencies (A16, A17, A21); RAID item and risk (A11, A18); document (A19); activity and audit record (A20, A52); consultant with skills (A22, A24); booking (A23); time entry and timesheet (A25); change request with approval steps (A27 to A30); sign-off (A40); training slot (A41); customer upload (A42); checklist item (A43); status report (A35); weekly snapshot for trends and the executive numbers (A10, A13, A45 to A47); notification (A50); saved view (A14); integration status (A53); role and permission (A51)
Automations	about 12	Change-request approval routing by hours (A29); approved change applied to the plan and the feed (A30); date change cascading to dependents with go-live preview (A17); over-capacity check on booking (A23, A81); timesheet approve or return (A25); portal sign-off record (A40); training slot booking (A41); CSV upload validation by row (A42, A82); weekly executive email at 08:00 per region (A48); notifications (A50); status report export to PDF and Word (A35); deal won in Salesforce creates a project (A92)
AI agents	1	Delivery Copilot on every internal screen with chart, status report, task, meeting summary and risk prediction tools, AI-written labels and suggested questions (A31 to A38, A78, A79)

Plus about 14 screens across three surfaces: internal desktop workspace, customer portal in three languages, and a phone view (BRD §6).

2. Asks

P0 (64)

Id	The words, verbatim	Source	Proposed owner
A9	“List every project with customer, region, stage, go-live date, health, lead, seats and contract value. Users search and filter by region, stage, health and lead. The count of results shows as "x of y". Filters that apply show as removable chips with one "clear all".”	BRD §5 P1	Gourav Mahunta
A10	“Show portfolio health as counts of On track, At risk and Off track, with the change since last week.”	BRD §5 P2	Gourav Mahunta
A11	“Place each open risk on a grid of likelihood against impact, so leaders see which risks matter most. Choosing a cell lists its risks.”	BRD §5 P3	Gourav Mahunta
A12	“Show every go-live date in the next 90 days on a timeline, grouped by region, with slipped dates marked.”	BRD §5 P4	Gourav Mahunta

Id	The words, verbatim	Source	Proposed owner
A13	“Show how the share of projects on track has moved over the last 12 weeks.”	BRD §5 P5	Gourav Mahunta
A14	“Leaders can save a filtered view and share it with their team.”	BRD §5 P6	Gourav Mahunta
A15	“A project overview shows the stage the project is in, the seven stages as a progress path, days to go-live, budget hours used against planned, open risks and the next customer sign-off due.”	BRD §5 W1	Gourav Mahunta
A16	“Tasks can be viewed as a list or as a board with one column per stage. A column shows a warning when it holds more than its limit (default 15). Tasks can be moved between columns by dragging or from a menu.”	BRD §5 W2	Gourav Mahunta
A17	“A timeline shows tasks with start and end dates, dependencies between them and the critical path. Changing a date moves dependent tasks and shows the new go-live date before it is saved.”	BRD §5 W3	Gourav Mahunta
A18	“A risks, assumptions, issues and decisions (RAID) log records each item with owner, due date, status and history.”	BRD §5 W4	Gourav Mahunta
A19	“A document library holds the statement of work, migration plans and sign-off records. Files open in a viewer inside the application.”	BRD §5 W5	Gourav Mahunta
A20	“An activity feed shows who changed what and when on the project.”	BRD §5 W6	Gourav Mahunta
A21	“Task detail opens beside the list so the user keeps their place. It shows description, assignee, dates, time logged, comments and attachments.”	BRD §5 W7	Gourav Mahunta
A22	“Show every consultant against the next 12 weeks with the percentage they are booked each week. Over 100% is flagged.”	BRD §5 R1	Gourav Mahunta
A23	“Book a consultant onto a project by choosing person, project, weeks and hours. Booking works without dragging.”	BRD §5 R2	Gourav Mahunta
A24	“Show consultants against skills (data migration, integrations, admin training, API, Japanese language) with a level for each, so the right person can be found.”	BRD §5 R3	Gourav Mahunta

Id	The words, verbatim	Source	Proposed owner
A25	“Consultants log time against tasks each day. Managers approve or return weekly timesheets, giving a reason when they return one.”	BRD §5 R4	Gourav Mahunta
A27	“An implementation lead raises a change request with the reason, the work added or removed, and the effect on hours, cost and go-live date.”	BRD §5 S1	Gourav Mahunta
A28	“Before submitting, the lead sees the plan before and after the change side by side, with the differences marked.”	BRD §5 S2	Gourav Mahunta
A29	“Changes under 40 hours need the delivery director's approval. Changes of 40 hours or more also need the finance partner, in that order. The request shows who has approved and who is next.”	BRD §5 S3	Gourav Mahunta
A30	“Rejecting a change request requires a written reason. Approved changes update the plan and are recorded in the activity feed.”	BRD §5 S4	Gourav Mahunta
A31	“Delivery Copilot is an AI assistant available from every internal screen.”	BRD §5.5 intro a	Gourav Mahunta
A32	“Anything it writes is labelled as AI-written.”	BRD §5.5 intro b	Gourav Mahunta
A33	“Users ask questions in plain language, for example "Which Japan projects go live in November and are at risk?" The assistant opens with three suggested questions based on the user's projects, and shows each stage while it works.”	BRD §5 A1	Gourav Mahunta
A34	“Chart tool: the assistant can answer with a chart, such as hours by stage or go-lives by month. Charts use the application's colours and show units.”	BRD §5 A2	Gourav Mahunta
A35	“Status report tool: the assistant drafts the weekly status report for a project from its tasks, risks and time entries. The lead edits and publishes it. The report can be exported as PDF or Word.”	BRD §5 A3	Gourav Mahunta
A36	“Task tool: the assistant can propose tasks, for example after a meeting summary. Proposed tasks are listed for the user to accept or reject; nothing is created without acceptance.”	BRD §5 A4	Gourav Mahunta

Id	The words, verbatim	Source	Proposed owner
A37	“Meeting summary tool: the assistant summarises a customer meeting transcript into decisions, actions and risks. Each point links to the part of the transcript it came from.”	BRD §5 A5	Gourav Mahunta
A38	“Risk prediction: the assistant flags projects likely to miss go-live, with a confidence level and the evidence for each flag, such as migration tasks running late.”	BRD §5 A6	Gourav Mahunta
A39	“Customer sponsors sign in to see only their own project: stage, milestones, upcoming sessions, open actions for their team and the documents shared with them.”	BRD §5 C1	Gourav Mahunta
A40	“Sponsors sign off a stage deliverable or request changes with a comment. A sign-off records who approved and when.”	BRD §5 C2	Gourav Mahunta
A41	“Sponsors book training sessions by choosing a day and then a time slot. Taken slots stay visible but cannot be chosen.”	BRD §5 C3	Gourav Mahunta
A42	“Sponsors upload files such as user lists (CSV up to 50,000 rows). Errors appear row by row and can be fixed before confirming.”	BRD §5 C4	Gourav Mahunta
A43	“A readiness checklist guides the customer through 10 setup items. An item they have not answered shows as not set, never as a guessed value.”	BRD §5 C5	Gourav Mahunta
A44	“The portal is available in English, German and Japanese.”	BRD §5 C6	Gourav Mahunta
A45	“A weekly summary shows six headline numbers with their change from last week: active projects, go-lives this month, projects at risk, average days to go-live, consultant utilisation and contract value awaiting go-live. A change is coloured by whether it is good or bad for the business, not by its sign.”	BRD §5 E1	Gourav Mahunta
A46	“Show how contract value awaiting go-live moved from last month to this month, split into new projects, go-lives completed, slipped dates and cancellations.”	BRD §5 E2	Gourav Mahunta
A47	“List the five projects that changed most this week, with the reason for each.”	BRD §5 E3	Gourav Mahunta

Id	The words, verbatim	Source	Proposed owner
A48	“The summary is also sent as an email every Monday at 08:00 in each region's time zone.”	BRD §5 E4	Gourav Mahunta
A49	“Consultants see today's tasks and sessions, update a task's status, and log time in under 30 seconds on a phone.”	BRD §5 M1	Gourav Mahunta
A50	“Notifications for new assignments, sign-offs and mentions. Each can be marked read or opened.”	BRD §5 M2	Gourav Mahunta
A51	“Roles control what each user can see and change. Show roles against permissions as a grid.”	BRD §5 D1	Gourav Mahunta
A52	“Keep a record of who did what and when. It cannot be edited and can be filtered by person, project and action.”	BRD §5 D2	Gourav Mahunta
A53	“Show the status of each integration (Salesforce, Slack, Google Drive, Jira) with last sync time and any error.”	BRD §5 D3	Gourav Mahunta
A54	“Project settings (name, region, go-live date, budget hours) can be edited in place, with clear unsaved, saving, saved and failed states.”	BRD §5 D4	Gourav Mahunta
A55	“Sign-in, forgot password, reset password”	BRD §6 Screens	Gourav Mahunta
A76	“Projects appear here once a lead assigns you”	BRD §9 Situations the screens must handle, situation: No projects assigned yet	Gourav Mahunta
A77	“Nothing matches the current filters, with a way to clear them”	BRD §9 Situations the screens must handle, situation: A search or filter matches nothing	Gourav Mahunta
A78	“Which stage it is on”	BRD §9 Situations the screens must handle, situation: Copilot is still working	Gourav Mahunta

Id	The words, verbatim	Source	Proposed owner
A79	“Why, and what to try instead”	BRD §9 Situations the screens must handle, situation: Copilot cannot answer	Gourav Mahunta
A80	“Which one, since when, and what is affected”	BRD §9 Situations the screens must handle, situation: An integration has failed	Gourav Mahunta
A81	“Who, which weeks and by how much, before saving”	BRD §9 Situations the screens must handle, situation: A booking takes someone over capacity	Gourav Mahunta
A82	“For example 214 of 50,000 rows need fixing”	BRD §9 Situations the screens must handle, situation: A customer upload has errors	Gourav Mahunta
A83	“The item shows as not set”	BRD §9 Situations the screens must handle, situation: A checklist item has no answer	Gourav Mahunta
A84	“Who can grant access”	BRD §9 Situations the screens must handle, situation: The user has no access to a project	Gourav Mahunta
A85	“How to stay signed in”	BRD §9 Situations the screens must handle, situation: The session is about to end	Gourav Mahunta
A86	“When it was last updated”	BRD §9 Situations the screens must handle, situation: Data is out of date	Gourav Mahunta
A96	“The first release does not include the following, and the application must not suggest otherwise:”	BRD §12	Gourav Mahunta

Id	The words, verbatim	Source	Proposed owner
A97	“Billing, invoicing or revenue recognition.”	BRD §12 Out of scope	Gourav Mahunta
A98	“Building or editing customer workspaces in the core ClickUp product.”	BRD §12 Out of scope	Gourav Mahunta
A99	“Hiring, performance reviews or payroll for consultants.”	BRD §12 Out of scope	Gourav Mahunta
A100	“A public marketing site.”	BRD §12 Out of scope	Gourav Mahunta
A101	“Video calls or call recording.”	BRD §12 Out of scope	Gourav Mahunta
A102	“Offline use of the phone view.”	BRD §12 Out of scope	Gourav Mahunta

P1 (49)

Id	The words, verbatim	Source	Proposed owner
A1	“Delivery Command should make all three visible and actionable.”	BRD §2	Gourav Mahunta
A2	“Brand colour: none supplied. Take it from the live site clickup.com.”	BRD §3 Brand colour	Gourav Mahunta
A3	“Logo: no file supplied. Fetch the official logo. It appears on the sign-in page, the expanded and collapsed left menu, the browser tab icon, the customer portal header, generated status reports (PDF and Word), and the weekly executive email.”	BRD §3 Logo	Gourav Mahunta
A4	“Customer logos: shown as circles on project cards and in the portal.”	BRD §3 Customer logos	Gourav Mahunta
A5	“Typeface: take it from the live site. Numbers must line up in tables. The customer portal must also display Japanese and German text correctly.”	BRD §3 Typeface	Gourav Mahunta
A6	“Tone: clear, calm and direct. Errors say what happened and what to do next. No jokes or exclamation marks in the product.”	BRD §3 Tone	Gourav Mahunta

Id	The words, verbatim	Source	Proposed owner
A7	“Feel: the internal workspace is a daily working tool and should stay dense and quiet. The customer portal and the executive summary are also shown in sales demos and should look polished.”	BRD §3 Feel	Gourav Mahunta
A8	“Appearance: light and dark both needed. Light is the default.”	BRD §3 Appearance	Gourav Mahunta
A26	“Should: show booked hours against capacity for each region over the quarter.”	BRD §5 R5	Gourav Mahunta
A56	“Internal users navigate with a left menu: Portfolio, Projects, Resourcing, Timesheets, Changes, Admin.”	BRD §6 Navigation	Gourav Mahunta
A57	“The top bar shows the current project or view, search, notifications and the profile menu.”	BRD §6 Navigation	Gourav Mahunta
A58	“Delivery Copilot opens as a panel on the right.”	BRD §6 Navigation	Gourav Mahunta
A59	“Customers get a shorter top menu: Home, Sign-offs, Sessions, Files, Checklist.”	BRD §6 Navigation	Gourav Mahunta
A60	“The phone has bottom tabs: Today, Tasks, Time, Alerts.”	BRD §6 Navigation	Gourav Mahunta
A61	“Portfolio list needs paging, search and filters”	BRD §7 Data volumes, row: Active projects 180 to 300	Gourav Mahunta
A62	“Board and timeline must stay readable”	BRD §7 Data volumes, row: Tasks per project 150 to 1,200	Gourav Mahunta
A63	“Resourcing grid is people against 12 weeks”	BRD §7 Data volumes, row: Consultants and leads about 72	Gourav Mahunta
A64	“Grid of likelihood against impact, with drill-down”	BRD §7 Data volumes, row: Open risks across the portfolio about 400	Gourav Mahunta
A65	“Portal must be simple for occasional users”	BRD §7 Data volumes, row: Customer users about 900	Gourav Mahunta
A66	“Timesheet approval in batches”	BRD §7 Data volumes, row: Time entries per week about 3,000	Gourav Mahunta

Id	The words, verbatim	Source	Proposed owner
A67	“Errors summarised, not listed in full”	BRD §7 Data volumes, row: Customer upload up to 50,000 rows	Gourav Mahunta
A68	“Text can grow by 30% in German”	BRD §7 Data volumes, row: Languages English, German, Japanese	Gourav Mahunta
A69	“On track, Signed off, Approved, Live”	BRD §8 Status words, meaning: Good or finished	Gourav Mahunta
A70	“At risk, Awaiting sign-off, Over capacity, Pending approval”	BRD §8 Status words, meaning: Needs attention	Gourav Mahunta
A71	“Off track, Blocked, Rejected, Sync failed”	BRD §8 Status words, meaning: Problem	Gourav Mahunta
A72	“Not started, Draft, Scheduled, Hypercare”	BRD §8 Status words, meaning: Neutral	Gourav Mahunta
A73	“Project IDs look like IMP-2611, change requests like CR-0457, risks like RSK-1183.”	BRD §8	Gourav Mahunta
A74	“Dates show in the user's format (17 Oct 2026, 17.10.2026, 2026年 10月 17日).”	BRD §8	Gourav Mahunta
A75	“Money shows in the contract currency (USD, EUR or JPY).”	BRD §8	Gourav Mahunta
A87	“The internal workspace is in English. The customer portal is in English, German and Japanese.”	BRD §10	Gourav Mahunta
A88	“Times show the user's time zone. Weeks start on Monday in Europe and Japan and on Sunday in North America.”	BRD §10	Gourav Mahunta
A89	“All drag actions also work from the keyboard. Controls are at least 24 px on desktop and larger on the phone.”	BRD §10	Gourav Mahunta
A90	“Meaning never depends on colour alone: every status shows an icon and a word.”	BRD §10	Gourav Mahunta
A91	“Screens meet WCAG 2.2 AA in both light and dark appearance.”	BRD §10	Gourav Mahunta
A92	“Contract value, seats and close date when a deal is won, which creates the project”	BRD §11 Integrations, system: Salesforce	Gourav Mahunta
A93	“Notifications and the weekly status post to each project channel”	BRD §11 Integrations, system: Slack	Gourav Mahunta

Id	The words, verbatim	Source	Proposed owner
A94	“Shared documents and customer uploads”	BRD §11 Integrations, system: Google Drive	Gourav Mahunta
A95	“Engineering escalations linked to project issues”	BRD §11 Integrations, system: Jira	Gourav Mahunta
A103	“21 days or more”	BRD §13 Success measures, measure: Average warning before a missed go-live	Gourav Mahunta
A104	“Under 10 minutes”	BRD §13 Success measures, measure: Time to produce a weekly status report	Gourav Mahunta
A105	“No more than 1 per consultant”	BRD §13 Success measures, measure: Consultant weeks booked above 100% per quarter	Gourav Mahunta
A106	“2 working days or less”	BRD §13 Success measures, measure: Customer sign-off time	Gourav Mahunta
A107	“10 minutes or less”	BRD §13 Success measures, measure: Executive time to read the weekly summary	Gourav Mahunta
A108	“75%”	BRD §13 Success measures, measure: Customers completing the readiness checklist without help	Gourav Mahunta
A109	“I want to see every project on one screen without scrolling.”	BRD §14 Stakeholder notes, Delivery director	Gourav Mahunta
A110	“Let us edit the timeline straight from the phone.”	BRD §14 Stakeholder notes, Consultants	Gourav Mahunta
A111	“Show customers their health score.”	BRD §14 Stakeholder notes, VP of customer success	Gourav Mahunta
A112	“Customers should never see internal health.”	BRD §14 Stakeholder notes, Implementation leads	Gourav Mahunta

Id	The words, verbatim	Source	Proposed owner
A113	“Colour-code consultants by region everywhere.”	BRD §14 Stakeholder notes, Resource manager	Gourav Mahunta

3. Open questions

For the POC lead. Each lists its options; the recommended one is marked.

No.	Question	Options
1	Customer health in the portal: the VP of customer success says "Show customers their health score" (A111); implementation leads say "Customers should never see internal health" (A112).	a. Portal shows no internal health; customers see stage, milestones and open sign-offs only (C1) **(recommended)** b. Portal shows a customer-facing health score, separate from the internal one c. Portal shows the internal health as-is
2	Phone editing: consultants ask "Let us edit the timeline straight from the phone" (A110), while M1 lists only today's tasks, status and time on the phone and W3's timeline is a desktop screen.	a. Phone stays at M1/M2 (today, task status, time, alerts); timeline edits stay on desktop **(recommended)** b. Add a simple date change for one task on the phone, with the go-live preview from W3 c. Full timeline editing on the phone
3	One screen without scrolling: the delivery director wants "every project on one screen without scrolling" (A109), while the BRD expects 180 to 300 projects with paging (A61, BRD P1).	a. Portfolio opens on health counts, risk grid and go-live timeline that fit one screen; the paged project list sits below **(recommended)** b. A compact one-row-per-project list sized to fit the seeded projects with no paging c. Keep the paged list only

No.	Question	Options
4	Region colours: the resource manager wants "Colour-code consultants by region everywhere" (A113), while §10 says "Meaning never depends on colour alone" (A90).	a. Region shown as a labelled chip with a colour on resourcing and portfolio screens, never colour alone **(recommended)** b. Colour-code by region on every screen as asked, each with a text label c. No region colours
5	Sales' "Add a pricing calculator for upsells" (A114) reads as another use case and sits near §12's exclusion of billing. Is it left out of this demo?	a. Leave it out of scope; it stays listed under other use cases **(recommended)** b. Promote it (reply promote A114) as a simple calculator screen
6	Integrations (Salesforce, Slack, Google Drive, Jira; A53, A92 to A95): the profile allows only connections already on the tenant. How are they shown?	a. Seeded integration-status rows (last sync, one Sync failed) and a seeded deal-won event; no live connection **(recommended)** b. Use live connections for whichever of the four already exist on orbit.uat, seeded for the rest c. Ask the client for sandbox credentials
7	Logo: the BRD says "Fetch the official logo" (A3) while the profile's standing answer for no supplied logo is a text wordmark placeholder.	a. Sample the official logo from clickup.com, as the BRD asks, and list it in the G2 pack **(recommended)** b. Text wordmark placeholder per the profile
8	Phone view (M1, M2, bottom tabs): one responsive code app or a separate mobile app?	a. A phone-width route inside the same code app, shown in a phone frame **(recommended)** b. A separate mobile app
9	Portal languages (A44, A87): how far do German and Japanese go in the demo?	a. Full language switch on every portal screen with translated seeded text and local date/number formats **(recommended)** b. English portal with a working switch on the home screen only

No.	Question	Options
10	Data volume: the profile seeds 15 to 20 fictional rows; the BRD describes 180 to 300 projects, about 72 consultants, about 400 risks and a 50,000-row upload (§7).	a. 15 to 20 projects with the six BRD sample customers, about 12 consultants, enough risks to fill the grid, and a generated 50,000-row CSV with 214 bad rows for C4 **(recommended)** b. Seed at BRD volumes (about 200 projects) c. Profile minimum only
11	Finance partner (S3) is not among the six personas. Who approves 40-hour-plus changes in the demo?	a. A seeded finance partner user the presenter can switch to **(recommended)** b. The presenter approves both steps as the delivery director
12	Weekly executive email (E4, Monday 08:00 per region): sent for real or shown?	a. Scheduled automation built; the demo triggers one run to the presenter's inbox **(recommended)** b. Email preview page only, no send

4. Other use cases mentioned

Reply “promote A<n>” to bring one into this use case.
