Requirements · Noventiq test

Client Noventiq · use case “Noventiq test” · version 1, round 1 (kickoff) · harvested 2026-10-26 · POC lead and manager Gourav Mahunta

1. Summary

Asks added	37 in all: 9 P0, 22 P1, 6 other use cases (out of scope until promoted)
What the client wants	A common data layer over each country's CRM, ERP, payroll and time tools, shown as account, pipeline and gross-profit views plus a digital assistant, for 3 entities and 3 business views; demo date 10th November.

Size hint

Part	Count	Asks behind it
Objects	about 8	customer account with one customer key (A5, A11, A20), opportunity with its stage mapped to one group set of stages (A12, A21), service catalogue and local-code mapping (A22, A27), entity / country (A1, A3, A28), monthly gross-profit lines by service line, country, customer (A4, A13, A23), project with timesheets and people cost at standard rates (A6, A24, A31), vendor rebate (A8), data exception (A15, A17)
Automations	about 4	normalise CRM stages and services to the group lists (A21, A22), match customers across three CRMs (A11, A20), compute monthly gross profit with Finance's rule and reconcile it (A23, A30, A16), flag the difficult cases: unmatched customer, late rebate, missing timesheets (A15, A17)
AI agents	1	a digital assistant that answers questions over the account, pipeline and gross-profit data, with every number traced to its source (A9, A14, A26)

Sources read

- #noventiq-poc-build-studio-cloud: whole history (10 messages) and its 4 threads (2 with replies: the bot's POC set-up and 'build' threads, no asks in them). No gate threads exist yet.
- The forwarded scope note's full text from its original in #p_noventiq (the channel copy is cut off after 'key income sour...').
- 10 images shared in the channel (Noventiq's own POC deck, photographed from a Teams call), read with the Slack file read.
- POC Studio row POC-noventiq-test-20261026: no psl_document rows and no psl_feedback rows.
- Gmail: searched 'noventiq OR embee' since 2026-10-01 - no threads.

Sources not read

- Noventiq Use Case.mov (Slack file F0CBKCX8PEF, 78.8 KB, also linked on Google Drive): Slack answered file_content_unavailable on 4 spaced attempts; no Google Drive tools are connected in this session, so the Drive copy could not be fetched.

- Google Calendar: not connected (the connector needs a new sign-in).
- Google Drive (Meet transcripts, recordings): not connected.
- Call transcripts: none shared; the 2026-10-23 Teams call the slides were photographed from has no transcript.

File	What it shows
WhatsApp Image 2026-10-23 at 5.48.08 AM (2).jpeg	Client slide 5 'Connecting systems is the easier part - agreeing common definitions is the real work': table of customer, pipeline, services, gross profit, people cost and ownership problems today vs what the POC must settle; example of 'Qualified' meaning different things in two CRMs.
WhatsApp Image 2026-10-23 at 5.48.08 AM (1).jpeg	Client slide 7: three layers - reports and AI assistants, a common data layer owned by Noventiq, today's systems unchanged.
WhatsApp Image 2026-10-23 at 5.48.07 AM (3).jpeg	Client slide 9: three POC entities by difficulty - NetSuite + Creatio entity (easy; HR local provider, Zoho Projects), Embee (typical; Dynamics, SAP B1, DarwinBox/local, Zoho Projects), NQ AI (hard; Black and White CRM, Tally, payroll to confirm, Azure DevOps). NetSuite runs in LatAm, APAC, MEA, India and Germany.
WhatsApp Image 2026-10-23 at 5.48.07 AM.jpeg	Client slide 10: six practical questions (get the data, make it consistent, Finance trust, keep it running, copy or read live, scaling cost).
WhatsApp Image 2026-10-23 at 5.48.07 AM (2).jpeg	Client slide (Approach): the client's own POC runs about four months in five phases, weeks 1-16, to an ExCom go decision; workstream B starts week 1.
WhatsApp Image 2026-10-23 at 5.48.07 AM (1).jpeg	Client slide 14 on a Teams call (photo of a screen): Deliverable 1, rollout sequencing options (by business question, function, country, system type, dataset).
WhatsApp Image 2026-10-23 at 5.48.06 AM (1).jpeg	Client slide 15: Deliverable 2, common business definitions and who decides each (Sales, Practice leads, Finance, Delivery, HR).
WhatsApp Image 2026-10-23 at 5.48.06 AM.jpeg	Client slide 16 on a Teams call: Deliverable 3, technical decisions (data location, hard systems tested on Tally and B&W, customer master, AI, security on their Azure tenant, platform); data residency watch-out for two India entities.

File	What it shows
WhatsApp Image 2026-10-23 at 5.48.05 AM (1).jpeg	Client slide 17: Deliverable 4, the working prototype - what it must show, what the test report contains, the difficult cases to test.
WhatsApp Image 2026-10-23 at 5.48.05 AM.jpeg	Client slide 18 on a Teams call: Deliverable 5, costed implementation plan and business case (cost to build, cost to run, value; in-house vs external vs hybrid).

3. Open questions

For the POC lead. Answer by number in the G1 thread; the recommended option is listed first.

No.	Question	Options
1	Which three business views does the demo show?	1. Account + pipeline, Gross profit, Vendor rebates (recommended: the slide's 'What it must show' names accounts, pipeline and gross profit, and rebates are 'a key income source') 2. Account + pipeline, Gross profit, Utilisation and delivery profitability 3. Account + pipeline, Gross profit, Booking and profit forecast
2	Which three countries or entities does the demo use?	1. The three entities on slide 9 (recommended) 2. Three countries the lead names
3	The CRM is written 'Cresio' in the scope note (A3) and 'Creatio' on the client's slide 9. Which is right?	1. Creatio (recommended) 2. Cresio as written
4	The recording 'Noventiq Use Case.mov' (Slack file, 78.8 KB, also a Drive link) could not be read: Slack returned file_content_unavailable on every attempt and no Drive tools are connected in this session. Can the lead share a transcript or re-upload the file?	1. Share a transcript or notes (recommended) 2. Re-upload the recording as a POC input file 3. Ignore it - the slides and scope note are enough

No.	Question	Options
5	Is 'Demo Date: 10th November' (A10) the date this Studio build is shown to Noventiq (2026-11-10), and who is in the room?	1. Yes, 2026-11-10, build ready the day before (recommended) 2. It is another meeting; the lead gives the demo date
6	The client's slide asks for 'a working prototype on real data'; the profile says the demo data is assumed and fictional. Which for this demo?	1. Fictional data with seeded difficult cases (recommended) 2. Sample data the client provides
7	Who may see payroll and people cost in the demo ('Payroll visible to entitled only', A31)?	1. Finance vs Sales personas (recommended) 2. One admin persona, no role split
8	The scope note mentions an insurance claim AI accelerator shared by the client as the UI reference (A9). Can the lead share it?	1. Proceed without it (recommended) 2. Lead shares the reference first
9	The client's POC deliverables 1, 2, 3 and 5 (rollout plan, written definitions, target architecture, costed business case) and the test-report effort measures are recorded as other use cases (A18, A19, A34-A37). Keep them out of this demo?	1. Keep them out (recommended) 2. Promote some of them

4. Other use cases mentioned

Reply “promote A<n>” to bring one into this use case.
